Compatible Substrates:

- Fast make-ready pads
- Simple and Convenient job changeovers
- Increased precision
- Improved repeatability of pad placement
- No tools required

ExpressPad and the ExpressPad Coupler

The ExpressPad System from ITW Trans Tech offers unmatched ease and flexibility when it comes to pad changeovers.

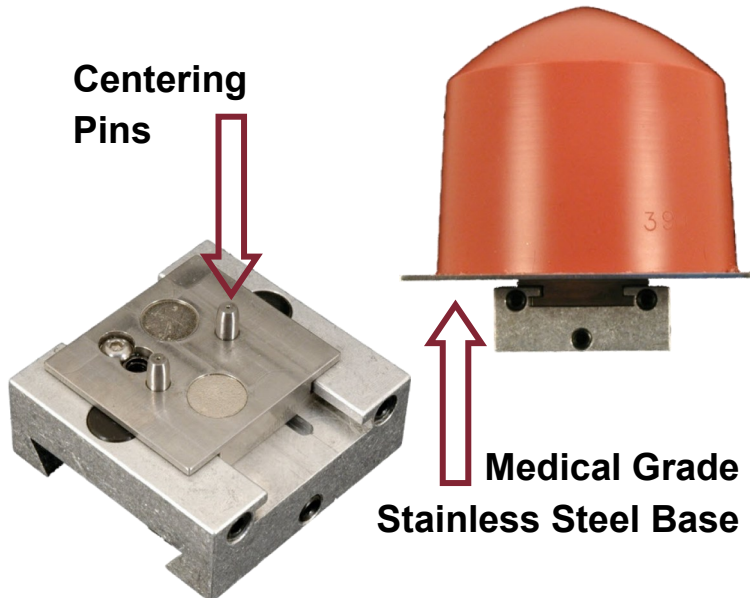

Available on Aero™, Orion™, and Syncro™ pad printing machines, as well as retrofit system availability.

Give yourself the capability to change your pads in seconds rather than minutes, simplify pad rotation, and change your pads without the use of tools!

The ExpressPad offers increased precision with X and Y adjustments, and the ExpressPad coupler centering pin allows the ExpressPad to snap right into place and stay tight with a strong magnetic hold.

Each ExpressPad base allows for multiple pad mount configurations and is made with medical grade stainless steel.
