

SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II - Germany

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

INK- PG Pad Printing Inks

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses			
Colorant; Printing ink related material; Printing ink.			
Uses advised against	Reason		
Not applicable.			

1.3 Details of the supplier of the safety data sheet

Manufacturer/ Distributor	ITW Trans Tech 475 North Gary Avenue Carol Stream, II 60188 USA 630 752 4000 www.itwtranstech.com
Emergency telephone	
number	:352-323-3500 (Info Trac)

1.4 Emergency telephone number Supplier

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Acute Tox. 4, H302 Aquatic Chronic 3, H412

Classification according to Directive 1999/45/EC [DPD]

The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

if swallowed.
-term adverse effects in the aquatic

See Section 16 for the full text of the R-phrases declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements	
Hazard pictograms	
Signal word	: Warning
Hazard statements	 Fammable liquid and vapor. Harmful if swallowed. Harmful to aquatic life with long lasting effects.
Precautionary statements	
Prevention	: Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not eat, drink or smoke when using this product.
Response	: IF SWALLOWED: Rinse mouth. In case of fire: Use water spray, dry chemical powder or carbon dioxide for extinction.
Storage	: Store in a well-ventilated place. Keep cool.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazardous ingredients	: 2-butoxyethyl acetate
Supplemental label elements	: Not applicable.
2.3 Other hazards	
Other hazards which do not result in classification	: None known.

SECTION 3: Composition/information on ingredients

			Classification		
Product/ingredient name	Identifiers	%	67/548/EEC	Regulation (EC) No. 1272/2008 [CLP]	Туре
butoxyethyl acetate	REACH #: 01-2119475112-47 EC: 203-933-3 CAS: 112-07-2 Index: 607-038-00-2	10 < 20	Xn; R21/22	Acute Tox. 4, H302 Acute Tox. 4, H312	[1] [2]

	CAS: 64742-95-6		Xi; R37 R66, R67 N; R51/53	Asp. Tox. 1, H304 Aquatic Chronic 2, H411	
2-methoxy- 1-methylethyl acetate	REACH #: 01-2119475791-29 EC: 203-603-9 CAS: 108-65-6 Index: 607-195-00-7	5 < 10	R10	Flam. Liq. 3, H226	[2]
			See Section 16 for the full text of the R- phrases declared above.	See Section 16 for the full text of the H statements declared above.	

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

Date of issue	: 26 October, 2015	Page: 3/13
Eye contact	: Check for and remove any contact lenses. Immediately flush ey temperature water for at least 15 minutes, keeping eyelids open accidental eye contact, avoid concurrent exposure to the sun or light which may increase the sensitivity of the eyes.	. In case of
General	 In all cases of doubt, or when symptoms persist, seek medical a anything by mouth to an unconscious person. If unconscious, pl position and seek medical advice. 	

SECTION 4: First aid measures

Inhalation	: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
Skin contact	 Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Ingestion	 If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to medical doctor	: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	: No specific treatment.

SECTION 5: Firefighting measures

Date of issue	: 26 October, 2015	Page: 4/13
Special protective equipment for fire-fighters	: Appropriate breathing apparatus may be required.	
Special protective actions for fire-fighters	: Cool closed containers exposed to fire with water. Do not releadrains or watercourses.	ase runoff from fire to
5.3 Advice for firefighters		
Hazardous thermal decomposition products	: Decomposition products may include the following materials: c carbon dioxide, smoke, oxides of nitrogen.	arbon monoxide,
Hazards from the substance or mixture	: Fire will produce dense black smoke. Exposure to decomposit cause a health hazard.	
	rom the substance or mixture	
Unsuitable extinguishing media	: Do not use water jet.	
Suitable extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) or foam.	
5.1 Extinguishing media		

SECTION 5: Firefighting measures

SECTION 6: Accidental release measures

6.1 Personal precautions, pro	ote	ective equipment and emergency procedures
For non-emergency personnel	:	Exclude sources of ignition and ventilate the area. Avoid breathing vapor or mist. Refer to protective measures listed in sections 7 and 8.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.
6.3 Methods and materials for containment and cleaning up	:	Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

SECTION 7: Handling and storage

7.1 Precautions for safe handling	 Vapors are heavier than air and may spread along floors. Vapors explosive mixtures with air. Prevent the creation of flammable or concentrations of vapors in air and avoid vapor concentrations his occupational exposure limits. In addition, the product should only be used in areas from which other sources of ignition have been excluded. Electrical equipme protected to the appropriate standard. To dissipate static electricity during transfer, ground drum and concontainer with bonding strap. Operators should wear antistatic for and floors should be of the conducting type. Keep container tightly closed. Keep away from heat, sparks and tools should be used. Avoid contact with skin and eyes. Avoid the inhalation of dust, parmist arising from the application of this mixture. Eating, drinking a be prohibited in areas where this material is handled, stored and Put on appropriate personal protective equipment (see Section 8 Never use pressure to empty. Container is not a pressure vessel Always keep in containers made from the same material as the or Comply with the health and safety at work laws. 	explosive igher than the all naked lights and ent should be onnect to receiving otwear and clothing flame. No sparking inticulates, spray or and smoking should processed.
7.2 Conditions for safe storage, including any incompatibilities	 Store between the following temperatures: 5 - 35 °C Store in accordance with local regulations. Notes on joint storage Keep away from: oxidizing agents, strong alkalis, strong acids. Additional information on storage conditions Observe label precautions. Store in a dry, cool and well-ventilate from heat and direct sunlight. Keep away from sources of ignition Prevent unauthorized access. Containers that have been opened resealed and kept upright to prevent leakage. 	n. No smoking.
7.3 Specific end use(s) Recommendations	: Not available.	
Date of issue	: 26 October, 2015	Page: 5/13

SECTION 7: Handling and storage

Industrial sector specific	:	Not available.
solutions		

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
2-butoxyethyl acetate	TRGS900 AGW (Germany, 4/2014). Absorbed through skin.
	PEAK: 520 mg/m ³ 15 minutes.
	PEAK: 80 ppm 15 minutes.
	TWA: 130 mg/m ³ 8 hours.
	TWA: 20 ppm 8 hours.
cyclohexanone	TRGS900 AGW (Germany, 4/2014). Absorbed through skin.
	PEAK: 80 mg/m ³ 15 minutes.
	PEAK: 20 ppm 15 minutes.
	TWA: 80 mg/m ³ 8 hours.
	TWA: 20 ppm 8 hours.
Solvent naphtha (petroleum), light arom.	TRGS900 MAK (Germany).
	Schichtmittelwert: 200 mg/m ³ 8 hours.
2-methoxy-1-methylethyl acetate	TRGS900 AGW (Germany, 4/2014).
	PEAK: 270 mg/m ³ 15 minutes.
	PEAK: 50 ppm 15 minutes.
	TWA: 270 mg/m ³ 8 hours.
	TWA: 50 ppm 8 hours.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

8.2 Exposure controls

Date of issue	: 26 October, 2015	Page: 6/13
---------------	--------------------	------------

SECTION 8: Ex	posure controls/	personal protection
----------------------	------------------	---------------------

Appropriate engineering controls	: Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapors below the OEL, suitable respiratory protection must be worn.
Individual protection measu	ures
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Use safety eyewear designed to protect against splash of liquids.
Skin protection	
Hand protection	: Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.
Gloves	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	 Personnel should wear antistatic clothing made of natural fibers or of high- temperature-resistant synthetic fibers.
Respiratory protection	: If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.
Environmental exposure controls	: Do not allow to enter drains or watercourses.

SECTION 9: Physical and chemical properties

Explosive properties	:	Not applicable.
Oxidizing properties	:	Not applicable.

9.2 Other information

No additional information.

SECTION 10: Stabilit	y and reactivity
10.1 Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	: Stable under recommended storage and handling conditions (see Section 7).
10.3 Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products.
10.5 Incompatible materials	: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
10.6 Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

SECTION 13: Disposal considerations

Do not allow to enter drains or watercourses.

Dispose of according to all federal, state and local applicable regulations.

If this product is mixed with other wastes, the original waste product code may no longer apply and the appropriate code should be assigned.

For further information, contact your local waste authority.

13.1 Waste treatment methods

<u>Product</u>	
Methods of disposal	: The generation of waste should be avoided or minimized wherever possible.
	Disposal of this product, solutions and any by-products should at all times comply
	with the requirements of environmental protection and waste disposal legislation
	and any regional local authority requirements. Dispose of surplus and non-

	with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Packaging	
Methods of disposal	: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
European Waste Catalogue (EWC):	: 08 03 12 waste ink containing dangerous substances
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned

thoroughly internally. Avoid dispersal of spilled material and runoff and contact with
